La storia della Fratelli Frattini inizia nel 1958 in un laboratorio nei pressi del Lago d'Orta, incantevole località italiana inserita tra il verde delle Alpi e i boschi piemontesi. Da quell'anno la tradizione del lavoro artigianale intrapresa da tre fratelli, Pier Luigi, Benito e Giuseppino, si è trasmessa per generazioni e ancora oggi è l'anima della nostra azienda. Questo consente di avere cura di ogni prodotto e seguire da vicino tutte le fasi della sua lavorazione supportata da moderne tecnologie, per creare prodotti di qualità e design.

## PVD: physical vapour deposition

**IT** PVD è l'acronimo di physical vapour deposition ed indica la tecnologia utilizzata per la deposizione di film metallici sottili su diverse tipologie di substrati. Il processo avviene all'interno di camere sotto vuoto, dove vengono evaporati i metalli che si intendono depositare.

**EN** PVD is the acronym for physical vapour deposition and stands for the technology used for the deposition of thin metal films on different types of substrates. The process takes place inside vacuum chambers, where the metals to be deposited are evaporated.

**FR** PVD est l'acronyme de physical vapour deposition (dépôt physique en phase vapeur) et désigne la technologie utilisée pour le dépôt de films métalliques minces sur différents types de substrats. Le processus se déroule à l'intérieur de chambres à vide, où les métaux à déposer sont évaporés.

**SP** PVD es el acrónimo de physical vapour deposition (deposición física de vapor) y representa la tecnología utilizada para la deposición de películas metálicas delgadas sobre diferentes tipos de sustratos. El proceso se lleva a cabo dentro de cámaras de vacío, donde se evaporan los metales a depositar.

**DE** PVD ist die Abkürzung für Physical Vapour Deposition und steht für die Technologie zur Abscheidung dünner Metallfilme auf unterschiedlichen Substrattypen. Der Prozess findet in Vakuumkammern statt, in denen die abzuscheidenden Metalle verdampft werden.

**IT** Affinché i prodotti possano mantenere inalterate nel tempo le loro caratteristiche originali, si raccomanda di effettuare le normali operazioni di pulizia utilizzando esclusivamente acqua e sapone neutro con l'ausilio di un panno morbido. Altri tipi di spugne (pagliette, spazzole, dischetti di metallo) non vanno assolutamente adoperate. Va evitato l'impiego di polveri, detergenti abrasivi, soluzioni acide, acido acetico o aceto, acido solforico, ipoclorito di sodio, acido formico, acido muriatico, acetone, trielina, candeggina e disinfettanti domestici.
La nostra azienda non si assume alcuna responsabilità per eventuali danni causati dalla mancata osservanza delle raccomandazioni per la pulizia. Si ricorda che è necessario asciugare con cura i rubinetti, le doccette e i soffioni dopo ogni utilizzo al fine di rimuovere i residui di prodotti per l'igiene personale, come sapone liquido, dentifricio, shampoo e schiuma da bagno, poiché possono rovinare la brillantezza della superficie del prodotto.

**EN** To maintain unaltered all the original characteristics of the mixer, it is suggested to clean constantly the products by exclusively use of water, neutral soap and soft cloth.
Other types of sponges (metal sponges, brushes, metal discs) are to avoid as well as the employment of powders, abrasive solvent, acid solutions, acid acetic or vinegar, sulphuric acid, sodium hypochlorite, formic acid, muriatic acid, acetone, trichlorethylene, sodium hypochlorite solution and domestic disinfectant.
Our company will not be responsible for damages caused by not observing this suggestions for cleaning. It is necessary to dry very carefully the taps, showers and hand showers after each use in order to remove some residues of personal hygiene products as liquid soap, toothpaste shampooing and bath foam since can damage the brightness of the product surface.

**FR** Pour maintenir intactes toutes les caractéristiques d'origine du mélangeur, il est conseillé de nettoyer constamment les produits en utilisant exclusivement de l'eau, du savon neutre et un chiffon doux.
Les autres types d'éponges (éponges métalliques, brosses, disques métalliques) sont à éviter ainsi que l'emploi de poudres, solvant abrasif, solutions acides, acide acétique ou vinaigre, acide sulfurique, hypochlorite de sodium, acide formique, acide chlorhydrique, acétone, trichloréthylène , solution d'hypochlorite de sodium et désinfectant domestique.
Notre société ne sera pas responsable des dommages causés par le non-respect de ces suggestions de nettoyage. Il est nécessaire de sécher très soigneusement les robinets, les douches et les douchettes après chaque utilisation afin d'éliminer certains résidus de produits d'hygiène personnelle comme le savon liquide, le dentifrice, le shampooing et la mousse de bain car ils peuvent endommager la brillance de la surface du produit.

**SP** Para mantener inalteradas todas las características originales de la batidora, se sugiere limpiar constantemente los productos utilizando exclusivamente agua, jabón neutro y paño suave.
Se deben evitar otros tipos de esponjas (esponjas metálicas, cepillos, discos metálicos) así como el empleo de polvos, solventes abrasivos, soluciones ácidas, ácido acético o vinagre, ácido sulfúrico, hipoclorito de sodio, ácido fórmico, ácido muriático, acetona, tricloroetileno, solución de hipoclorito de sodio y desinfectante doméstico.
Nuestra empresa no será responsable por los daños causados por no observar estas sugerencias de limpieza. Es necesario secar con mucho cuidado los grifos, duchas y teleduchas después de cada uso para eliminar algunos residuos de productos de higiene personal como jabón líquido, champú de pasta de dientes y espuma de baño que pueden dañar el brillo de la superficie del producto.

**DE** Um alle ursprünglichen Eigenschaften des Mixers unverändert zu erhalten, wird empfohlen, die Produkte regelmäßig ausschließlich mit Wasser, neutraler Seife und einem weichen Tuch zu reinigen.
Andere Arten von Schwämmen (Metallschwämme, Bürsten, Metallscheiben) sind ebenso zu vermeiden wie der Einsatz von Pulvern, abrasiven Lösungsmitteln, Säurelösungen, saurer Essig- oder Essigsäure, Schwefelsäure, Natriumhypochlorit, Ameisensäure, Salzsäure, Aceton, Trichlorethylen , Natriumhypochloritlösung und Haushaltsdesinfektionsmittel.
Unser Unternehmen übernimmt keine Haftung für Schäden, die durch die Nichtbeachtung dieser Reinigungsempfehlungen entstehen. Wasserhähne, Brausen und Handbrausen müssen nach jedem Gebrauch sehr sorgfältig getrocknet werden, um Rückstände von Körperpflegeprodukten wie Flüssigseife, Zahnpasta, Shampoo und Badeschaum zu entfernen, da diese den Glanz der Produktoberfläche beeinträchtigen können.

**IT** **La cromatura innovativa dei rubinetti di F.lli Frattini**

F.lli Frattini mette in atto una ricerca di eccellenza qualitativa che valorizza la scelta del **cromo trivalente**.

La scelta di introdurre il **cromo trivalente** nella produzione, e cominciare ad abbandonare il cromo esavalente, riconosciuto cancerogeno e dannoso per gli ambienti di lavoro aziendali, ci è parsa la scelta giusta. Una scelta responsabile volta alla tutela della natura e della salute del nostro personale, che tutti i giorni lavora nei nostri stabilimenti. La deposizione di **cromo trivalente**, nota anche come tricromo, ad oggi si propone come alternativa valida sostanzialmente per applicazioni di tipo decorativo. Dal punto di vista estetico il risultato conferisce maggiore lucentezza e definizione valorizzando qualsiasi tipo di superficie. I test effettuati sul deposito dei nostri articoli, confermano che le caratteristiche meccaniche di tale finitura hanno una resistenza alla corrosione simile al cromo esavalente.

**Cromatura Green**

Scegliere il **cromo trivalente** significa per F.lli Frattini pensare alla tutela del patrimonio ambientale, ma soprattutto una grossa forma di rispetto verso la salute umana.

Nel nostro caso il deposito di cromo si ottiene partendo da una soluzione i cui Sali base sono sì di cromo ma in forma **trivalente** e quindi meno impattanti in merito a:

- utilizzo da parte degli operatori in fase di preparazione e alimentazione (aggiunte) delle soluzioni, i prodotti utilizzati non sono cancerogeni e/o mutageni come il cromo triossido
- emissioni in atmosfera, le soluzioni di **cromo trivalente** non formano aerosol di cromo (come nelle tradizionali deposizioni esavalenti) per cui non necessitano di particolari sistemi di abbattimento
- trattamento delle acque di risulta dai lavaggi post deposizione, nel caso di cromo esavalente servono dei trattamenti particolari di abbattimento e trasformazioni del cromo esavalente in **cromo trivalente** che a noi non occorrono
- sensibile riduzione dei rifiuti prodotti e conseguente minor imbatto sull'ambiente in termine di fanghi (esenti nel nostro caso) che devono essere necessariamente o termo distrutti o stoccati in discariche con tutte le conseguenze che ben conosciamo.

Per tutti questi motivi la F.LLI FRATTINI ha voluto differenziarsi ancor prima che la normativa lo richieda con la realizzazione di un impianto a basso impatto ambientale.

**EN** **Innovative Chrome Plating of Fratelli Frattini taps**

F.lli Frattini is conducting an excellence quality research aiming to take full advantage of **trivalent chrome plating**.

The choice to introduce **trivalent chrome plating** in production and start to dismiss the hexavalent chrome plating considered carcinogenic and hazardous for the company working environment, is the right way.

A responsible choice to protect nature and our employees' health committed daily in our plants. Deposition of **trivalent chrome**, known as trichrome, is today suggested as valid alternative for decorating application. Aesthetically the result is of major brightness and definition enriching all surface types. Tests conducted on deposit of chrome on our items confirm that mechanical characteristics of this finishing have the same resistance to corrosion as hexavalent chrome plating.

**Green chrome plating**

Choosing **trivalent chrome plating** means to F.lli Frattini protect the environment heritage and above all a great respect for human health.

In our case the chrome deposit is obtained from a solution in which the base salts are made of **trivalent chrome**, less dangerous for:

- the use from the operators during the preparation phase and feeding (addition) of solutions, products used are not carcinogenic and or mutagen as trioxide chrome
- emission in the atmosphere without special abatement systems since solution of **chrome trivalent** do not form chrome aerosols (as in the traditional hexavalent depositions)
- treatment of waste waters resulting from post deposition washing in the case of hexavalent chrome requires special abatement treatments and transformation treatments from hexavalent to **trivalent chrome**, that we do not need
- significant reduction of the waste and consequently lower environment impact in terms of sludge (exempt in our case) which must either thermally destroyed or stored in landfills with all the well-known consequences.

For all these reasons F.LLI FRATTINI wanted to differentiate itself even before the legislation requires with the creation of a low environmentally impact plant.
